This volume of original research contains specific policy reform proposals for promoting prosperity in West Virginia. The authors present the case for why state policy should focus more heavily on promoting long-run economic growth. The authors review the scientific evidence on which policies best promote growth and conclude that a policy climate consistent with capitalism, or 'economic freedom, ' is the best way to accomplish growth and higher living standards. These policies work because they result in increased capital formation, higher labor productivity, and reduced levels of wasteful rent-seeking and lobbying activity. This volume concludes with a set of specific growth-oriented policy reforms that address the broad spectrum from tax policy to legal reform to the security of private property rights. We hope that readers of this volume will come away with a better understanding of capitalism's true potential to generate long-run economic progress

Promotes an awareness of metals in America's buildings and monuments, and makes recommendations for the preservation and repair of such metals. Intended for owners, architects, and building managers who are responsible for the preservation and maintenance of America's architectural heritage. When metal building components need rehabilitation or maintenance, info. on proper preservation techniques for each metal and its alloys has not been available. This sourcebook on historic architectural metals is a reference on metals used in architecture; how they are used, how to identify them, and when to replace them. Photos

A compilation of 3M voices, memories, facts and experiences from the company's first 100 years.

Masterpiece offers a detailed discussion of the nature of the earth's terrestrial environment, and a method of subdividing and studying it. 1941 edition.

At which moments and in which ways did Jews play a central role in the development of American capitalism? Many popular writers address the intersection of Jews and capitalism, but few scholars, perhaps fearing this question's anti-Semitic overtones, have pondered it openly. Chosen Capital represents the first historical collection devoted to this question in its analysis of the ways in which Jews in North America shaped and were shaped by America's particular system of capitalism. Jews fundamentally molded aspects of the economy during the century when American capital was being redefined by industrialization, war, migration, and the emergence of the United States as a superpower. Surveying such diverse topics as Jews' participation in the real estate industry, the liquor industry, and the scrap metal industry, as well as Jewish political groups and unions bent on reforming American capital, such as the American Labor Party and the International Ladies' Garment Workers' Union, contributors to this volume provide a new prism through which to view the Jewish encounter with America. The volume also lays bare how American capitalism reshaped Judaism itself by encouraging the mass manufacturing and distribution of foods like matzah and the transformation of synagogue cantors into recording stars. These essays force us to rethink not only the role Jews played in American economic development but also how capitalism has shaped Jewish life and Judaism over the course of the twentieth century. Contributors: Marni Davis, Georgia State University Phyllis Dillon, independent documentary producer, textile conservator, museum curator Andrew Dolkart, Columbia University Andrew Godley, Henley Business School, University of Reading Jonathan Karp, executive director, American Jewish Historical Society Daniel Katz, Empire State College, State University of New York Ira Katznelson, Columbia University David S. Koffman, New York University Eli Lederhendler, Hebrew University, Jerusalem Jonathan Z. S. Pollack, University of Wisconsin-Madison Jonathan D. Sarma, Brandeis University Jeffrey Shandler, Rutgers University Daniel Soyer, Fordham University

In the decades following World War II, modern architecture spread around the globe alongside increased modernization, urbanization, and postwar reconstruction—and it eventually won widespread acceptance. But as the limitations of conventional conceptions of modernism became apparent, modern architecture has come under increasing criticism. In this collection of essays, experienced and emerging scholars take a fresh look at postwar modern architecture by asking what it meant to be "modern," what role modern architecture played in constructing modern identities, and who sanctioned (or was sanctioned by) modernism in architecture. This volume presents focused case studies of modern architecture in three realms—political, religious, and domestic—that address our very essence as human beings. Several essays explore developments in Czechoslovakia, Romania, and Yugoslavia and document a modernist design culture that crossed political barriers, such as the Iron Curtain, more readily than previously imagined. Other essays investigate various efforts to reconcile the concerns of modernist architects with the traditions of the Roman Catholic Church and other Christian institutions. And a final group of essays looks at postwar homebuilding in the United States and demonstrates how malleable and contested the image of the American home was in the mid-twentieth century. These inquiries show the limits of canonical views of modern architecture and reveal instead how civic institutions, ecclesiastical traditions, individual consumers, and others sought to sanction the forms and ideas of modern architecture in the service of their respective claims or desires to be modern.

This study is based on three years of field work with 99 active gang members and 24 family members. The book describes the attractiveness of gangs, the process of joining, their chaotic and loose organisation, and their members' predominant activities - mostly hanging out, drinking, and using drugs. The authors also discuss gang members' rather slapdash involvement in major property crime and their disorganised participation in drug traffic, as well as the often fatal consequences of their violent life-style. Although the book focuses on the individual, organisational, and institutional aspects of gang membership, it also explores gang members' involvement with other school and neighborhood structures. Extensive interviews with family members provide groundbreaking insights into the gang members' lives. As much as possible, however, the story is told in the gang members' own words.

Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century

A distillation of sixty-seven of the best and most important plates from the original three volumes of the bestselling of the Historical Atlas of Canada.
