The partition between software running on the CPU and interface hardware is the basic decision in interface design. We can expand on our requirements to identify several factors that influence the decision. Algorithmic complexity. Some algorithms may be hard to implement as analog or digital circuits due to their size or the nature of the operations they perform.

The process of interaction design involves studying the behavior and structure of interactive systems and implementing them for developing useful digital products. In other words, interaction design is the relationship between user and product and the services they use. The purpose of interaction design is to create a great user experience.
