Global Agriculture Towards 2050 Rome Fao

This paper is a re-make of Chapters 13 of the Interim Report - World Agriculture: towards 2030/2050 (FAO, 2006). In addition, this new paper includes a Chapter 4 on production factors (land, water, yields, fertilizers). Revised and more recent data have been used as basis

WORLD AGRICULTURE TOWARDS 2030/2050

1 INTRODUCTION. One of the greatest challenges of the 21st century is to meet society's growing food needs whilst simultaneously reducing the environmental impact of agriculture (Foley et al., 2011). As a result of global population increase and changing demand, it is estimated that between 60%–110% more food could be needed by 2050 (Alexandratos & Bruinsma, 2012; Dawson, Perryman, & Osborne ...

Global projections of future cropland expansion to 2050 ...

It is estimated that by 2050 developing countries' net imports of cereals will more than double from 135 million metric tonnes in 2008/09 to 300 million in 2050. That is why there is a need to move towards a global trading system that is fair and competitive; and

that contributes to a dependable market for food.

How to Feed the World in 2050 - Food and Agriculture ...

To project the broad changes in the global farm and food system over the period 2006 to 2050, we utilize the Simplified International Model of agricultural Prices, Land use and the Environment (SIMPLE) (Baldos and Hertel 2013). It is a partial equilibrium model but unlike other global models, which are highly disaggregated, SIMPLE is designed to be as parsimonious as possible, while faithfully producing estimates of crop demand and supply at a global scale.

Global food security in 2050: the role of agricultural ...

agricultural productivity and climate change, as we move forward to 2050. The rest of the paper is organized as follows. In section “Model and methods”, we discuss the model of global agriculture that we use to project changes in crop production and food consumption and introduce the food

Global food security in 2050: the role of agricultural ...

Evidence cautiously suggests that, at the global level, agricultural production can be increased enough to satisfy the additional 60 per cent growth in demand projected to 2050, considering both food and
