Who was Gregor Mendel? •Gregor Mendel is the “Father of Modern Genetics.” He was an Austrian monk who studied heredity in pea plants. His work was published in

Read Free Gregor Mendel

1865. • He described “factors” that were passed between generations of plants. • We now know the factors are genes: chemical factors that determine characteristics.

Notes: Mendelian

Page 14/42

Read Free Gregor Mendel Genetics Notes

Gregor Mendel was an Austrian monk born in 1822. He was in charge of the monastery gardens where he conducted investigations that changed the field of biology forever. What did scientists
