~~How Drugs Influence Behavior: A Neuro-Behavioral Approach ...~~

It has been observed that drugs and alcohol worsen a person's behavior. Individuals who already have violent tendencies might become extremely violent when under the influence of drugs or alcohol, yet it's common for the person struggling not to find anything wrong in their behavior, and instead fall into the belief that they act or perform better when under the influence.

Where To Download How Drugs Influence Behavior A

Although initial drug use may be voluntary, drugs can alter brain chemistry. This can actually change how the brain performs and interfere with a person's ability to make choices. It can lead to intense cravings and compulsive drug use. Over time, this behavior can turn into a substance dependency or drug and alcohol addiction.

~~The Physical & Mental Effects of Drug Abuse | Gateway ...~~

Drug abuse causes adolescents to be more vulnerable to depression and suicidal behavior. Teen depression can be debilitating and cause teens to lose their ability to function successfully in school. Symptoms of depression can manifest themselves in the

form of children being late to class and unable to complete homework or other assigned tasks.

~~Drugs & How They Affect Teens in School | The Classroom~~

Long-term drug abuse changes areas in the brain that affect behavior, judgment, learning and memory. The reasoning and thought processing abilities of the drug abuser become severely damaged. Most drugs affect the brain by interfering with neurotransmitters or chemical messengers, according to the National Institute on Drug Abuse.

context of specific drug topics.

~~How drugs influence behavior: a
neuro-behavioral approach ...~~

Drugs interfere with the way neurons send, receive, and process signals via neurotransmitters. Some drugs, such as marijuana and heroin, can activate neurons because their chemical structure mimics that of a natural neurotransmitter in the body. This allows the drugs to attach onto and activate the neurons.

~~Drugs and the Brain | National
Institute on Drug Abuse (NIDA)~~

A drug is any substance (other than food) that can alter a person's physiological and/or psychological state. In this lesson,
