Orion SkyQuest™ XT10 Telescope Instruction Manual. Use a Collimating Tool. To aid in centering your line of sight down the focuser drawtube, and in centering the mirror reflections during collimation, it is very helpful to use a precision collimating tool containing crosshairs, such as the Orion Collimating Eyepiece (#3640).

orion-collimating-eyepiece-manual — Free Textbook PDF
Your Orion reflector telescope comes with a “quick collimation cap,” shown in Figure 3. This is a simple cap that fits on the focuser drawtube like a dust cap, but has a tiny hole in the center. The collimation cap helps center your eye over the focuser drawtube, making it easier to align the optical compo- nents.

How to Collimate a Telescope — Orion Telescopes and ...
Inserting an Eyepiece The final step in the assembly process is to insert an eye- piece to the telescope’s focuser. Take the cover cap off the end of the focuser drawtube. Loosen the setscrew on the focuser drawtube. Insert one of the eyepieces into the focuser drawtube, then secure it in place by tightening the setscrew.
