Synopsis. Ten European sandplay therapists describe how severe psychopathologies can be treated in the 'free and protected space' of the sandbox. The sandplay therapy cases in this book illustrate some of the most difficult, yet also most effective applications: psychoses, borderline syndromes, psychosomatic illnesses, drug addictions, or narcissistic character disorders.

This paper presents the results of a qualitative study on the use of sandplay, or sand tray therapy, in the psychotherapeutic process of children who have been sexually abused. A longitudinal study was carried out with seven participants between the ages of 7 and 10 years old. Data was produced during observation of the therapeutic activity over the course of three different phases of ...
