Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

This book provides a detailed description of much of the recent work of the Image Processing Group at University College London -- the group which pioneered the successful construction of fully parallel processor arrays. The genesis of the current system, CLIP4, is covered in an introduction which is followed by sections describing the development of parallel algorithms for image processing and the software required for such development. The application of the system to a variety of specific problems in image processing is described, as is further work on hardware and software systems of enhanced capability. The results of this research and development program hold considerable interest for computer scientists, image analysts, artificial intelligence experts, and electronic engineers worldwide.

Vaginal fisting - the intimate, potent sexual act of gradually inserting the entire hand into the vagina - is an increasingly popular form of sexplay among lesbians, bisexuals and heterosexuals alike. Now, for the first time, an experienced fister and fistee explains in detail how to fist with the greatest possible safety and pleasure. Extensively illustrated, this groundbreaking guide by Deborah Addington has been approved by three fisting-positive physicians and by many experienced practitioners. Also includes an eye-opening section of anecdotes and poetry by fisting-lovers, plus an extensive resource guide. A must-have "handbook" for the sexually explorative!

Many Americans today view the government as the savior of the environment. When it comes to protecting land, fish, and wildlife, the common response is to let government do it. The contributors to Government Versus the Environment encourage us to consider government in a different light by looking at clear instances of public programs that foster environmental destruction. They provide an in-depth look at of how the political process can adversely impact the quality of our environment and argue that the government's track record in managing natural resources has been and continues to be abysmal. The case studies in Government Versus the Environment will cause readers to think twice about the all-too-familiar calls for more government for the sake of the environment.
