Carousell - Snap to List, Chat to Buy
I purchased a Shimano SG-7R40 hub, and installed it on one of my own bicycles, an early '70s Peugeot PX-10 racing bike. My initial impression on actually using one was extremely favorable. I particularly like the RapidFire control unit, which is very easy to use and has a very light touch. I also am pleased at how well-protected the linkage to the hub is. This hub uses a rotating ring ...

The Brown compass is supported by a pulsing oil column. The pendulous torque is obtained by the flow of oil between two tanks. Air pressure generated by the spin of the gyro wheel forces the oil uphill to give it pendulosity, since it is naturally antipendulous, or top-heavy. It is damped by restricted flow of a viscous fluid in a tube.
