Function, and More

The male reproductive system consists of a number of sex organs that play a role in the process of human reproduction. These organs are located on the outside of the body and within the pelvis. The main male sex organs are the penis and the testicles which produce semen and sperm, which, as part of sexual intercourse, fertilize an ovum in the female's body; the fertilized ovum develops into a fetus, which is later born as an infant. The corresponding system in females is the female reproductive

Male reproductive system - Wikipedia
Male Reproductive Humans are sexual, meaning that both a male and a female are needed to reproduce. Each is equipped with specific organs capable of producing specific cells needed to procreate. In...

The male reproductive system includes the penis, scrotum, testes, epididymis, vas deferens, prostate, and seminal vesicles. The penis and the urethra are part of the urinary and reproductive systems.

Structure of the Male Reproductive System - Men's Health ...

The male reproductive system contains the penis, which houses the urethra, the passageway for the male reproductive cells (the spermatozoa or sperm) to exit the male body. Remember that the urethra is also the tube through which urine leaves the body. In males, the urethra thus has a dual function. The two testes produce sperm.
